

APTT3X Formula For Hidradenitis Suppurativa (HS), Usage Instructions, Helpful Tips, And Disclaimers

Ways to Use APTT3X Formula For HS:

Apply APTT3X every 12 hours to **any** HS area such as abscesses, lumps (under skin), pustules (Pimple-like), DEPs (blackhead-like, wounds, tunneling, etc).

Please follow the 4 steps below:

1. Wash both your hands and the HS area well with soap and water.
2. Gently squeeze the bottle; apply 1-2 drops to your fingertip and dab onto the desired area(s). **Alternatively, apply 1–2 drops of APTT3X directly to the HS area needing care. Do what feels best for you. *You may add additional drops if needed.*
3. Lightly massage the “solution” into the HS area AND around onto healthy (the HS free skin) for about 10-15 seconds.
4. You may use dressing. **To ensure complete APTT3X absorption, let it dry thoroughly before bandaging; avoid using highly absorbent dressings.*

Note, even if you see improvements right away, I suggest using up to 10-14 days. *You can use it longer if you wish.*

Tips:

While not mandatory, using exam gloves or a similar alternative can be beneficial when using APTT3X (due to the formula). If you're not using gloves, wipe your hands with a dry paper towel/cloth directly after using and before washing.

To remove APTT3X from skin if temporarily “stained”. Applying rubbing alcohol or witch hazel to a cotton ball or tissue is another effective method. Hand sanitizer is another good option.

Please Note:

The color of APTT3X formulation ranges from yellow to dark yellow; it could stain cloth and fabric.

It's normal for APTT3X to have a unique smell, which may decrease after application.

Pertinent Information:

Your personal data will be kept private and only used for this trial.

APTT3X Topical Formula contains **no** alcohol; **no** animal ingredients; **no harmful** biological ingredients.

Warnings:

- Keep away from children
- Don't get it in your eyes.
